

Growing to keep you going in north central Wisconsin.

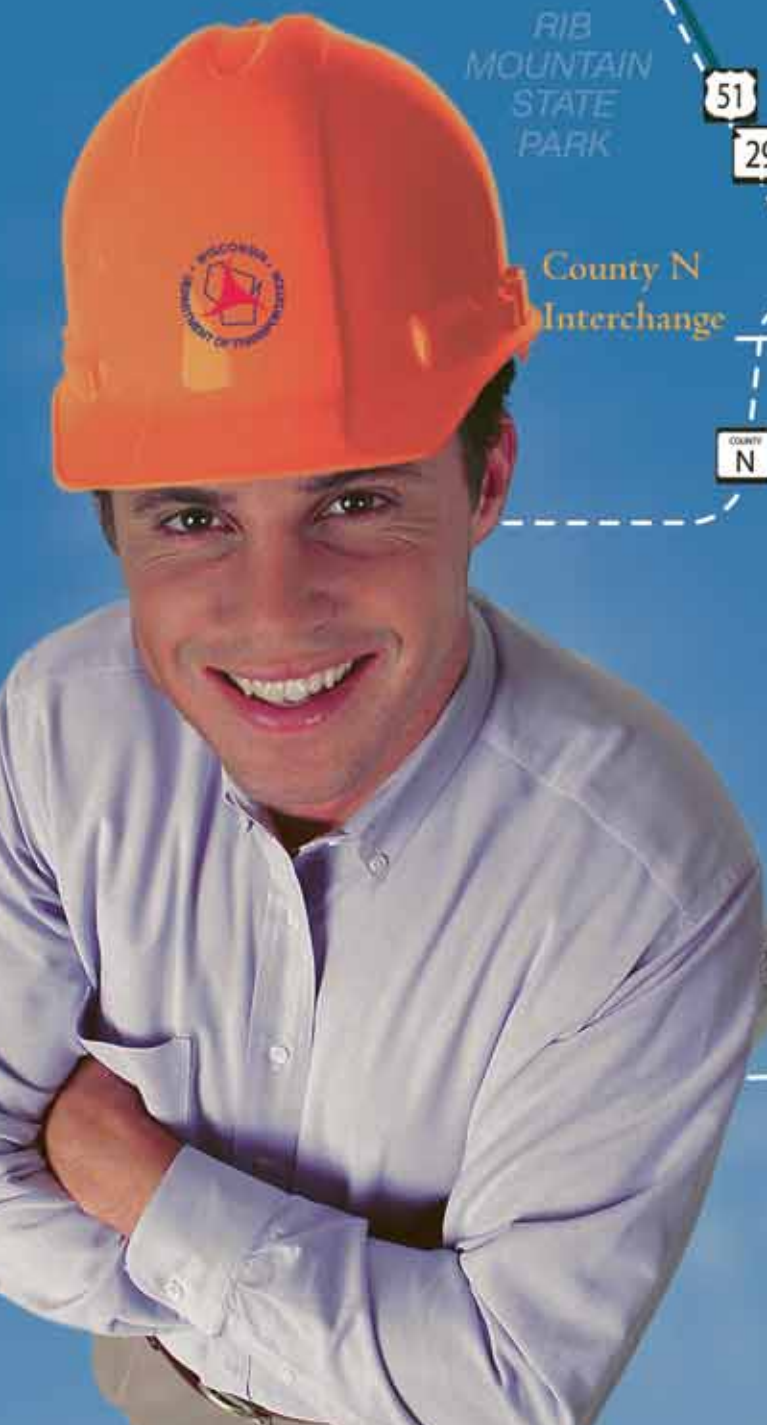

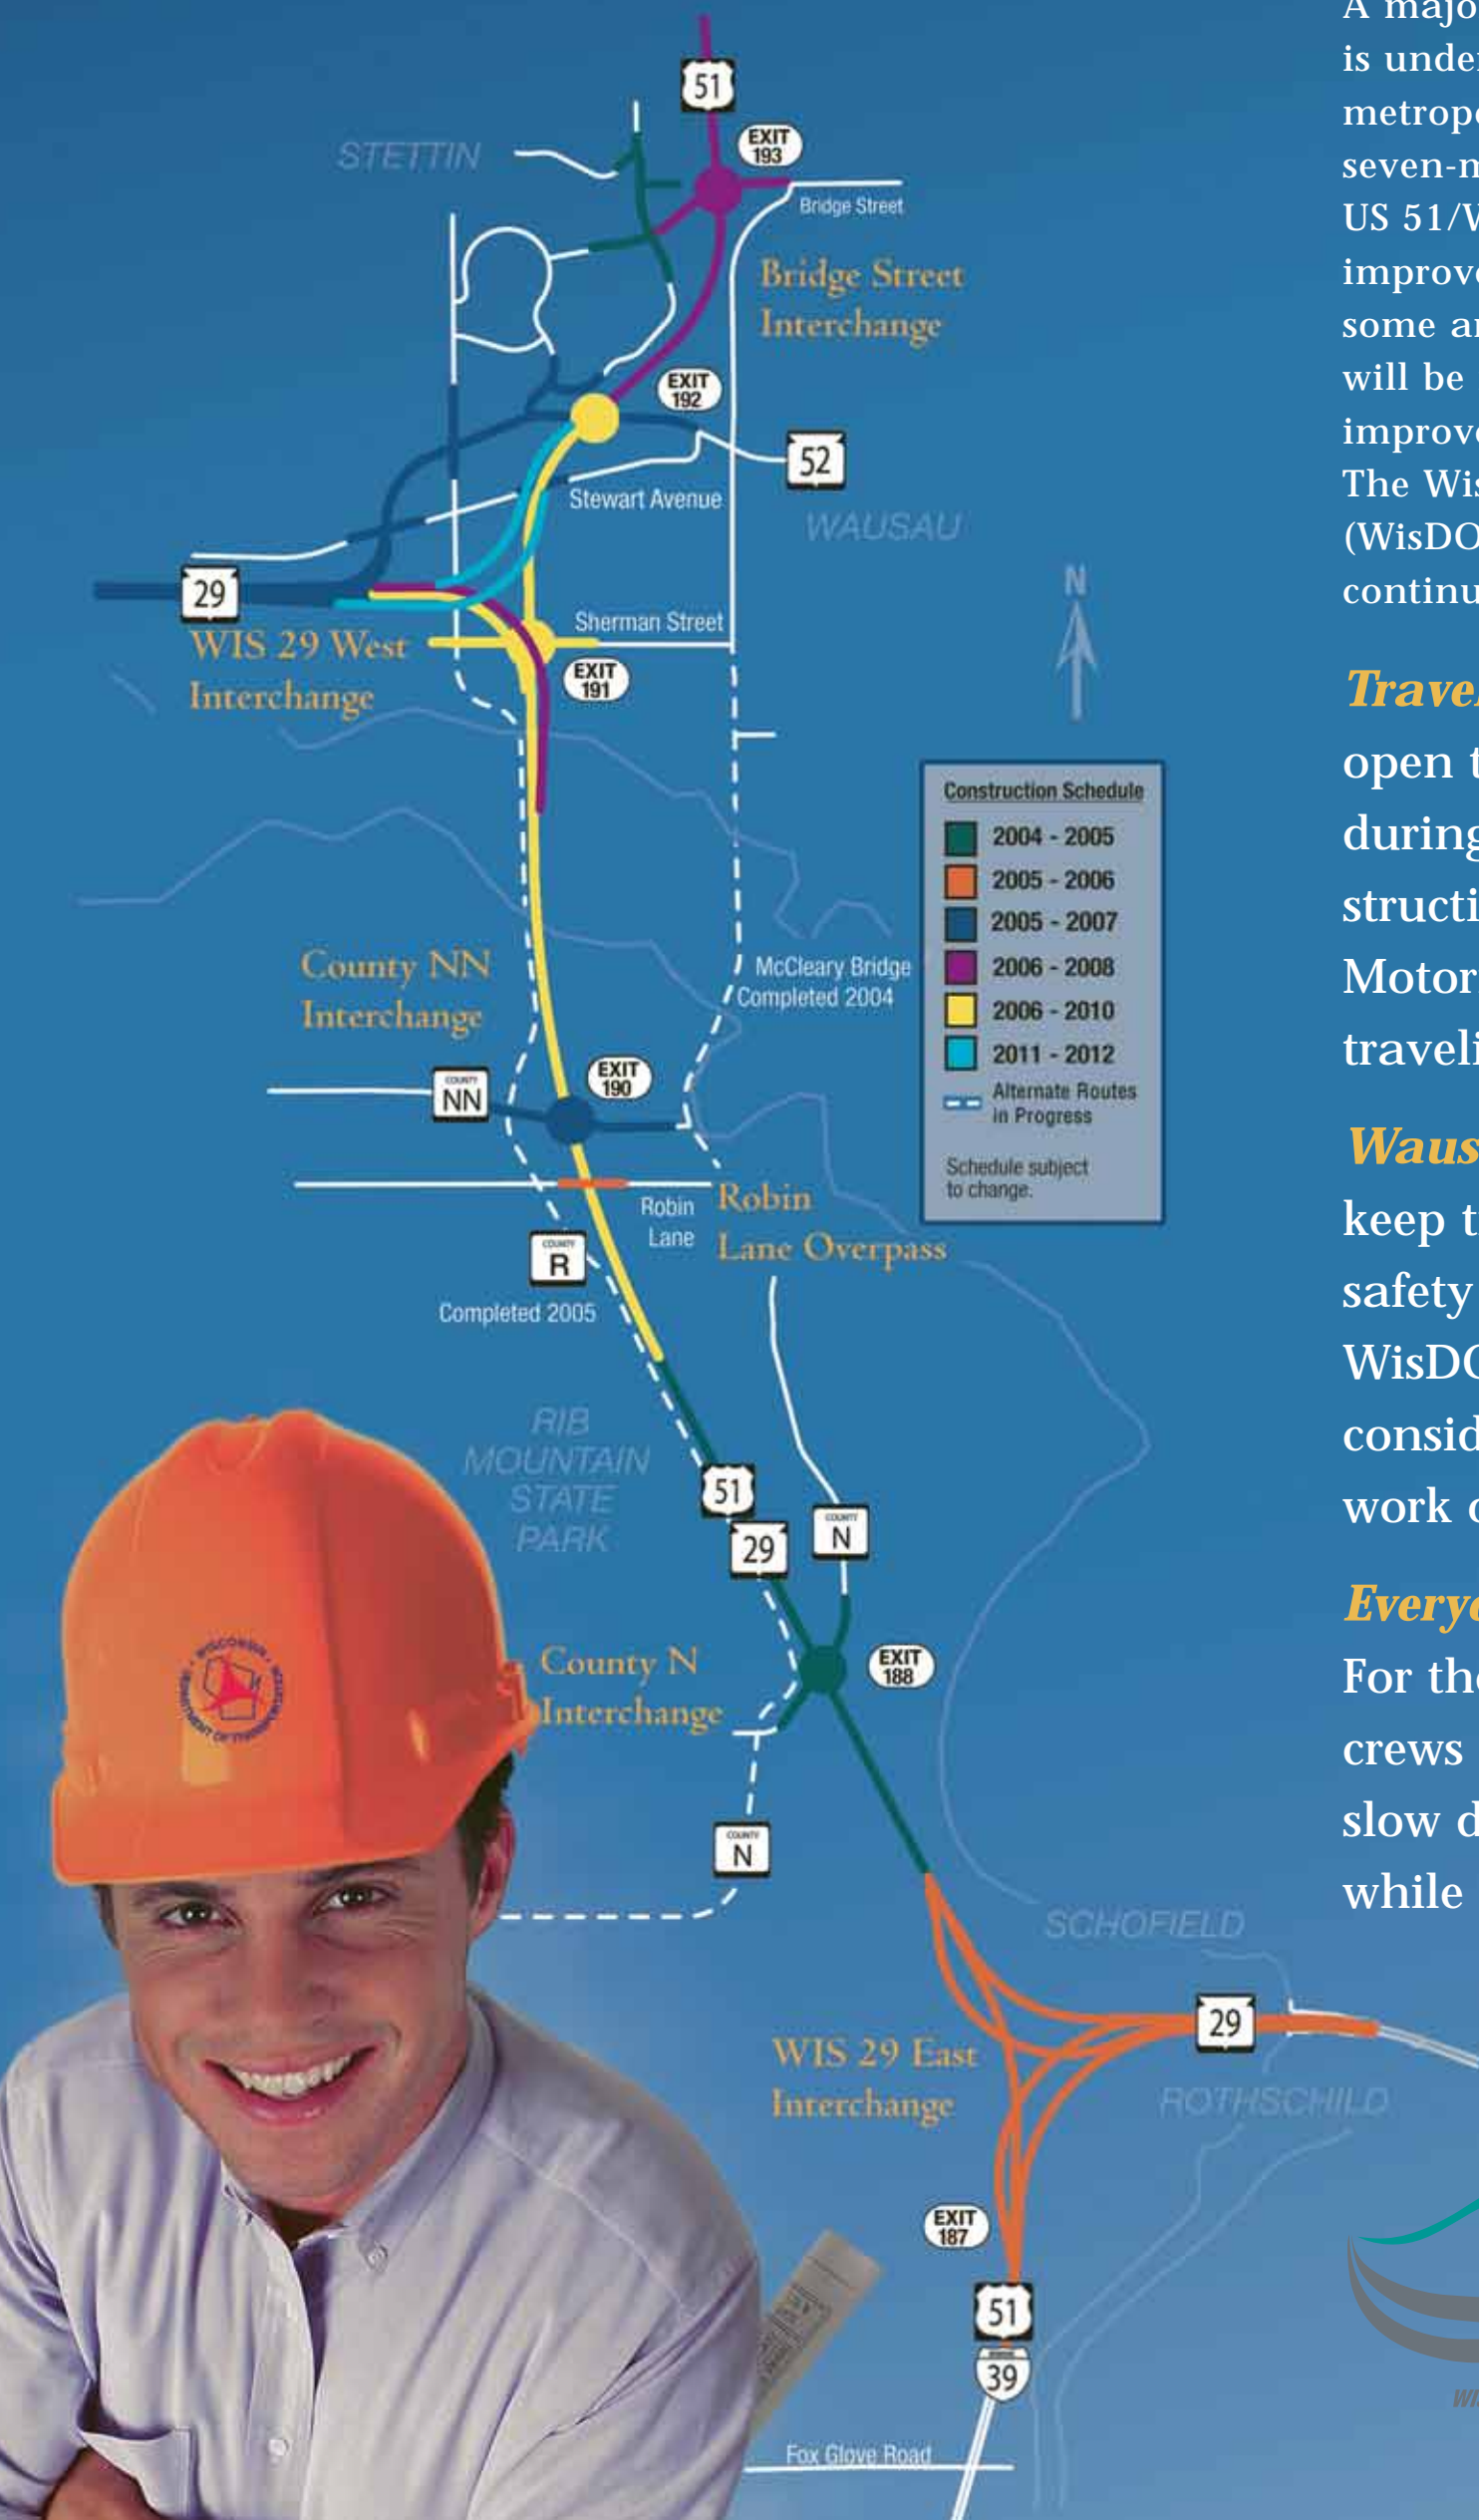

A major highway improvement project is underway in the Wausau metropolitan area. A seven-mile segment of US 51/WIS 29 will be improved to six lanes in some areas, and interchanges will be reconstructed to improve efficiency and safety. The Wisconsin Department of Transportation (WisDOT) project starts in 2004 and will continue for the next several years.

Travelers: Two lanes will remain open to traffic in each direction during construction. However, construction activities may cause delays. Motorists are encouraged to consider traveling during off-peak travel times.

Wausau area drivers: To help us keep traffic moving, and for the safety of the construction crews, WisDOT asks area motorists to consider using alternate routes to work or other local activities.

Everyone – please drive safely! For the safety of the construction crews and other motorists, please slow down and exercise extra caution while driving through work zones.
